

SCHEME
of the case History of Patients with surgical pathology for Medical Students, V
year, Faculty General Medicine, Surgical Clinic N2
of State Medical University "N.Testemitanu"

1. Questionnaire part of case history:
 - Passport data of patients
 - Curative institution
 - Preventive diagnosis
 - Definitive diagnosis
2. Patient's complains on the day of hospitalization.
3. Anamnesis of pathology, including all period of disease from the beginning till hospitalization.
4. Anamnesis of life (general development, all suffering pathology in chronological aspect, surgical interventions, traumas, for female – obstetrico-gynecological anamnesis).
5. Family anamnesis and bad habits
6. Assurance anamnesis
7. Clinical examination of patients, including all organs and systems (skin, lymphatic system, locomotor, nervous system, respiratory, cardio-vascular, digestive, excretory systems).
8. Description of local manifestation of pathology - to reflect in details the changes in the pathologic region. If the patient was operated - to characterize the postoperative wound, special feature of the process.
9. Data of all laboratory, instrumental methods of examination: X-ray examination, applied to patient, etc.
10. To formulate and argue the definitive diagnosis. If the patient is investigated incompletely, to make a program of following examinations, necessary to formulate a definitive clinical diagnosis.
11. To formulate preoperative conclusion and the preventive volume of surgical intervention, to elect the kind of anesthesia. If the patient was operated - draw up a report of surgical technique.
12. Conservative treatment.
13. Epicrisis. At the end of epicrisis to make the recommendation for following treatment, and professional recommendations (necessity to be under permanent observation of family doctor, dispensarization, changing the professional conditions).

P.S. Student must present the case history 2 days before finishing the course of surgery. Students, who do not present the case history would not be promoted on the Course of Surgery.

This scheme was discussed on the sitting of Surgical Clinic N2

Chief of Surgical Clinic N2,
MD, professor

VLADIMIR HOTINEANU
